Dear Jackie,

Keeping you in the loop: The first several attached comments from SFDPH are relevant for helping to improve community broader understanding of the big picture context behind this specific report.

Honestly I was thinking only of technical aspects and had not yet considered the CI aspects. This was a reminder that this is important too, since this will likely get a broader audience than a typical technical report.

I have also attached the draft main text of the rpt. Let me know if you also want to make any comments from a CI point of view. I have started drafting EPA comments in this file on One Drive (also in attached Word file).

Here is a link:

I will also send you an invitation to share it. I'm still trying to figure out how One Drive works. I hope one or the other will give you access to edit if you want to add your comments.
